## AWARD-WINNING DESIGN THAT TUCKS INTO VIRTUALLY ANY SETTING.

### WHAT

- + Designed by Allseating in collaboration with Canadian designer, Todd Yetman, the Tuck Family of award-winning seating is an accessible solution that is highly customizable, functional and comfortable.
- + These attributes make Tuck an ideal choice for Education, Healthcare, Hospitality and Corporate environments.
- + Its lightweight design allows Tuck to be neatly stacked and stored or nested away anywhere, while its sturdy frame with a clean aesthetic allows for continued, high-density use.
- + The Tuck Family offers seven streamlined base solutions and over 17 finish options allowing for visual continuity and versatility anyplace.
- + Tuck's forward-thinking design and functionality has been recognized with both a GOOD DESIGN Award and a Best of NeoCon Award.

### WHY

- + Team-centered design continues to evolve. Collaboration needs to happen anywhere and at anytime, whether it be in a cafeteria, training room, meeting room or nook.
- + To accommodate the growing need for choice in the workplace, a range of functional seating options is needed. Workplaces and education environments require flexible, multi-purpose spaces that can be easily transformed to fit the needs of any given day and get maximum potential of the space available.
- + Designers require highly-customizable seating options with a wider variety of color to create the appropriate mood for each environment and cohesion across an entire floorplan.

### HOW

- + Designed without fasteners to create an award-winning linear and clean aesthetic.
- + Back and seat contours designed with ergonomics and comfort in mind for short or long-term seating.
- + Nine base variations, each with unique application and benefits: 4-leg, 4-leg with Casters, Sled, Bar and Counter Stools in 4-leg and sled, Collaborative Task and Nester.
- + 11 polypropylene colors.
- + Wide range of frame finishes including chrome and 12 glossy paint options that can be mixed and matched with polypropylene back and seat colors for endless creativity.
- + Three seat styles: polypropylene, upholstered seat pad or fully upholstered seat.
- + Two back styles: polypropylene or fully upholstered back.
- + Arm styles include with arm or armless. Arm caps can be specified in any of the 11 polypropylene colors, either to match the seat and back or mix and match.
- + Proprietary Tuck Dolly available that conveniently and beautifully stacks 35 high for Sled Stacker and 20 high for 4-leg.
- + The entire Tuck Family is BIFMA tested to 350 lbs., allowing more users to be confidently supported.
- + Warrantied for 12 years on parts, and labor.
- + Additional accessories will be added to collection including an under the seat basket for greater functionality.

### DESIGNER

- + Todd Yetman, is a GOOD DESIGN Award winner and long-time collaborator with Allseating. Known for putting fit-and-finish first and designing products that are aesthetically clean, poetically beautiful and classic, Yetman is the founder of Toronto-based industrial design and engineering firm Yetman & Co.
