EXPLANATION OF ACT ICONS FOR UPHOLSTERY

Fire Retardancy

Flammability testing determined as fabric's resistance to burning.

Colorfastness to Wet and Dry Crocking

Colorfastness to wet & dry crocking refers to the rubbing off of color from the fabric onto clothing, hands or other materials and can occur under wet or dry conditions.

Colorfastness to Light

Colorfastness to light is the degree to which fabric will retain its color when exposed to light.

Physical Properties

3 physical property tests include: brush pill test to determine a fabric's pilling. Breaking/tensile strength is the ability of a fabric to withstand tension without breaking or tearing. Seam slippage is the pulling apart of fabrics at the seams.

Abrasion

Abrasion is the ability of a fabric to withstand damage from wear and rubbing. There is a general contract specification as well as heavy duty specification.
