

AYLES™

ALLSEATING

CRISP DESIGN. COOL COMFORT.

WHAT

- + Ayles is a stylish, modern lounge chair that blends business with relaxation. Designed by Allseating, Ayles exudes an elegant mid-century style that's as comfortable as it is affordable. Although Ayles is a lounge product, ergonomics are still built in, with a suspension consisting of an innovative formed metal spring-back frame for improved lumbar support and superior comfort. Ayles can also be fashioned in a wide range of colors to accentuate any space, from waiting areas to libraries, lounges, and executive offices.
- + Its knife-edge shape and enchanting name are inspired by its namesake, the stunning windswept Ayles Ice Shelf in the Canadian Arctic.

WHY

- + There is an increase in the need for lounge chairs in the modern workplace that fuse business and relaxation with design to facilitate teamwork and provide additional informal meeting areas.
- + Resimercial (residential/commercial) spaces replicate the comforts of home with commercial grade material engineering. These spaces that promote conversation and collaboration are popping up everywhere. You'll find them in industries ranging from corporate to education.
- + With hybrid work schedules blurring the line between commercial and home environments, there is a need for more flexible seating solutions.
- + The right seating solution has the power to shape the experience of the user. And ultimately, shape the overall mood of the workspace.

HOW

- + Available matching ottoman allows users to put their feet up in the proper ergonomic recline position while using a laptop or tablet.
- + Perimeter frame supports the ergonomic back suspension with deliberately tensioned springs and straps that form to the shape of the user's back and properly support the lumbar.
- + Vibrant color-blocking upholstery options provide countless aesthetic possibilities.
- + Three (3) base options include 4-prong lounge, 4-prong wood lounge base (wood available in bleached ash, medium ash, and dark ash), and 5-prong caster to suit a wide range of applications, such as lobbies, boardrooms, and even executive offices.
- + Choice of height adjustable cone or knee-tilt mechanism for two different designs and functionalities.
- + Optional auto return and auto height cylinder is available on both the lounge and caster bases. When specified, Ayles will return to center after the user has departed the chair.
- + Ayles' now features an optional tablet arm, that can be specified left or right-handed. The tablet has five (5) available laminate finishes: White, Black, Earth, Medium Wood, and Dark Wood.

DESIGNER

- + Since 1982, Allseating has developed a reputation for quickly adjusting to the changing needs of customers in the office, educational and healthcare sectors. Today, Allseating has evolved to have product designs for more environments than ever, truly demonstrating the concept of anywhere in all that we do. Inspired by our founder and CEO, Gary Neil, the Allseating team has become known for delivering excellent customer service at every touchpoint.
