			WIDTH 18.5"
			DEPTH 18.75"
			BACK HEIGHT 21"
			WIDTH 18.5"

All dimensions based on basic synchro tilt mechanism, unless otherwise noted

# ESSENTIALS STANDARD

Entail features essential adjustments such as a 2.5" seat slider and Basic Synchro Tilt Mechanism with 3 locking positions. The dynamic design of the back frame allows users to maintain full contact as they shift from task to task. To prevent fraying and to extend the chair's lifespan, the mesh is integrated directly into the back frame. For added support, an optional lumbar and headrest are available.

Entail comes standard with 4 different arm options: no arms, fixed arms, height adjustable arms, and pivoting arms. An adjustable width bracket is available for all arm options.
