

JIF[®]

CREATE IN A JIF

In today's open, mobile workplace, needing a comfortable spot to gather for short meetings happens at a moment's notice. Jif can be arranged around a coffee table for breakout meetings or across from a sofa or bench to fill out a circle. At a workstation, the stool can be stored out of sight underneath a desk and pulled out when needed.

COLLABORATE IN A JIF

Jif is a modern stool designed in collaboration with Canadian designer Aaron Duke. Embracing simple, elementary shapes, Jif features a subtle waterfall edge that provides relief to the hamstrings. Jif is available with a Still base or a Sway base for gentle rocking or swiveling that promotes active sitting by engaging the core.
