

THE MOST SUPERIOR LUMBAR VERTEBRA.

WHAT

- + L1 is a carefully crafted task seating solution that marries comfort and support with clean, simple and ergonomic design. Through the use of simple and customizable mechanisms, L1 accommodates a wide range of heights and body types to ensure all workers are being supported throughout the workday. Most importantly, even with excellent function and attractive design, L1 remains at an affordable price point, proving style, comfort and health need never be sacrificed in the name of cost.

WHY

- + Most businesses currently have reduced budgets but are still looking for cost-effective ways to provide value in their customization, comfort, and ergonomic features.
- + The home office is one of the largest growing trends in our industry. Designers are looking for low-cost highly ergonomic seating solutions to populate these new spaces.
- + With the changing needs of office space planning due to new standards for safe distancing, many companies are investing in a redesign as they reopen their offices to both their employees and the public. Stylish, modern design solutions are needed at lower costs.

HOW

- + Functions, such as the synchro-tilt mechanism, allow the users feet to remain on the floor as they tilt backwards, ensuring optimal comfort.
- + An integrated seat slider allows for simple and intuitive calibration.
- + Available in a Black and Birch finish – light and fresh look that fits into any space or design palate.

- + Available in the standard M10 Mesh, a comfortable, three-dimensional mesh (a soft and supportive textured material) in four colors: Black, Charcoal, Nickel, and Fog.

- + Also available in M9 Mesh in 10 eye-catching colors, M2 mesh in 9 bleach-cleanable colors, and a new upholstered back model for users who want more emphasis on comfort.

- + Standard arms are two directional - users can achieve optimal comfort by adjusting both up and down, as well as backward and forward. An option for a fixed arm and an option for a height-adjustable arm with pivoting arm caps are also available.

- + Upholstered Back model offered for users who want more emphasis on comfort.

- + An optional, adjustable headrest with two pivot points to move forward/back and up/down, optimizes user comfort.

- + Comes with an optional adjustable lumbar at no upcharge, tilt lock and tilt tension, allowing for easy adaptation to meet the needs of each user.

- + Standard carpet casters are in black, with optional dual surface casters in Birch or Black available at an upcharge.

- + Coming soon is the option for a higher back and wider, more generous seat. These additions to the L1 family will allow the chair to suit even more body types while still staying true to its accessible value offering.

DESIGNER

- + Since 1982, Allseating has developed a reputation for quickly adjusting to the changing needs of customers in the office, educational and healthcare sectors. Today, Allseating has evolved to have product designs for more environments than ever, truly demonstrating the concept of anywhere in all that we do. Inspired by our founder and CEO, Gary Neil, the Allseating team has become known for delivering excellent customer service at every touchpoint.
