

# REQUISITE®

TODD YETMAN

## WORKPLACE DIVERSITY.

### WHAT

- + Designed in collaboration with Allseating and award-winning designer Todd Yetman, Requisite was designed to fill the need for a conference seating solution that is accessible and designed to make a first and lasting impressions for budget-minded businesses. Requisite combines classic lines and materials, like aluminum, commonly found in conference chairs of the past, with a hint of modern design, to create a look that is transitional across many environments.
- + Making a good first impression is important in business relationships, and Requisite does just that.
- + Classic lines combine with modern materials to create a look that is welcoming at all angles. Intersecting materials create visual interest at 360-degrees.
- + Business is a meeting of the minds. Requisite is a series of seating solutions that bring together creativity and economy, innovation and stability, first and lasting impressions. All equate to an ideal solution for conference or executive spaces.

### WHY

- + Accessible design; businesses, anywhere from start-ups to larger business supporting thousands of employees, are all in need of stylish, accessible conference and executive seating.
- + Businesses want their workplace design to reflect their culture, making a statement of who they are as a company.
- + First and lasting impressions are crucial to a successful business relationship. The conference room is where those impressions are commonly made. Requisite's fine lines, detailed stitching and chrome accents allow businesses to put their best foot forward and make that impression.

- + With tighter budgets comes the need for well-designed, accessible seating. Both new and seasoned businesses are looking to make lasting impressions through their workplace design, and at an accessible price-point.

### HOW

- + Over 100 configuration options before upholstery and stitching selection.
- + Back heights: available in midback or highback.
- + Detailed stitching and zippers available in contrast colors for creative expression.
- + Four arm styles: polished aluminum loop, painted loop (black or smoke), 7-arm (black or smoke), upholstered closed arm, all designed to connect beautifully to the back of the chair.
- + Two mechanism options: Synchro tilt or Knee tilt.
- + The chair's defined edges and sharpness of the aluminum meet architectural and structural design trends.
- + Every detail has been carefully considered to provide a full 360-degree experience.
- + The various options allow the customer to customize their perfect chair.
- + Accessible conference seating; where many conference chairs can be expensive, Requisite is offered at a number of great lower-grade leathers and other standard offerings.
- + A highly durable all-steel frame allows the back to flex to support lengthier conversations and a more comfortable sitting experience.

- + The synchro-tilt mechanism simultaneously tilts as you lean back.
- + The knee tilt mechanism provides maximum recline.
- + In keeping with our commitment to providing solid ergonomic solutions, adjustments can be made conveniently from the seated position.
- + Design options combine three arm styles, two back heights and two mechanisms in order to tailor Requisite to your specific needs.

### DESIGNER

- + Todd Yetman, is a GOOD DESIGN Award winner and long-time collaborator with Allseating. Known for putting fit-and-finish first and designing products that are aesthetically clean, poetically beautiful and classic, Yetman is the founder of Toronto-based industrial design and engineering firm Yetman & Co.
