

# TUCK<sup>®</sup>

## AWARD-WINNING DESIGN THAT TUCKS INTO VIRTUALLY ANY SETTING.

---

### WHAT

Designed by Allseating in collaboration with Canadian designer, Todd Yetman, the Tuck Family of award-winning seating is an accessible solution that is highly customizable, functional and comfortable. These attributes make Tuck an ideal choice for Education, Healthcare and Corporate environments. Its lightweight design allows Tuck to be neatly stacked and stored, while its sturdy frame with a clean aesthetic allows for continued, high-density use. The Tuck Family offers seven streamlined solutions and over 25 finish options allowing for visual continuity and versatility across any space. Tuck's forward-thinking design and functionality has been recognized with both a GOOD DESIGN Award and a Best of NeoCon Award.

### WHY

- + Team-centered design continues to evolve. Collaboration needs to happen anywhere and at any time, whether it be in a cafeteria, training room, boardroom or meeting nook.
- + Educational environments are increasingly highly-interactive and require durable, movable, storable, flexible and functional solutions throughout the floorplan.
- + To accommodate the growing need for choice in the workplace, a range of functional seating options is needed to accommodate work at desks, on modular systems or at counter-top stations. Workplaces and facilities require flexible, multi-purpose spaces that can be easily transformed to fit the needs of any given day and get maximum potential of the space available.
- + Stacking is not an option in some environments, for instance when there is limited vertical space or elderly facilities personnel, an alternate solution is needed to stow temporary seating, such as neatly in a row.
- + Designers require highly-customizable seating options with a wider variety of color to create the appropriate mood for each environment and cohesion across an entire floorplan.

## HOW

- + Designed without fasteners to create an award-winning linear and clean aesthetic.
- + Seven (7) base variations, each with unique application and benefits: 4-leg, 4-leg with Casters, Sled, Sled Bar Stool, Sled Counter Stool, Collaborative Task and Nester.
- + 14 polypropylene colors offer a wide range of hues; six neutrals and eight vibrant colors.
- + Wide range of frame finishes including chrome and 14 glossy paint options that can be mixed and matched with polypropylene back and seat colors for endless creativity.
- + Three (3) seat styles: polypropylene, upholstered seat pad or fully upholstered seat.
- + Two (2) back styles: polypropylene or fully upholstered back.
- + Arm styles include with arm or armless. Arm caps can be specified in any of the 14 polypropylene colors, either to match the seat and back or mix and match.
- + Proprietary Tuck Dolly available that conveniently and beautifully stacks 35 high for Stacker and 20 high for 4-leg.
- + The entire Tuck Family is BIFMA tested to 350 lbs., allowing more users to be confidently supported.
- + Warrantied for 12 years on not only parts, but also labor.

### BEYOND THE CHAIR REASONS TO CHOOSE ALLSEATING

Our simple, comprehensive warranty is one of the best in the industry.

Our exceptional customer service encompasses product specification, on-time delivery, out of box quality and every touch point in between.

We're willing to adapt our products or services to meet our client's needs.

SCS Gold Certified.
